

Call for Volunteers to join the PEGNL Small Fishing Vessel Safety Task Force

Are you passionate about maritime safety and environmental sustainability? Do you have expertise in naval architectural engineering, small fishing vessel design, environmental stewardship, or workplace safety? If so, you may be interested in volunteering for a PEGNL task force aiming to better understand and address potential safety and environmental issues concerning the regulation of small fishing vessel (SFV) design.

About the Task Force

The SFV Safety Task Force is being established to review potential safety and environmental concerns related to SFV design regulations. Currently SFVs must adhere to specific regulations that may create challenges for the safe and environmentally efficient design of these vessels. The task force will explore these potential concerns further.

Task Force Objectives

- Evaluate the prevalence of unlicensed practices in SFV design.
- Develop strategies to engage key stakeholders affected by SFV design.
- Prepare a statement addressing the current challenges in design practices.
- Organize a Forum to review issues and propose solutions.
- Create informative materials for stakeholders outlining problems and solutions.
- Foster collaboration among stakeholders at provincial and federal levels.

Join Us!

If you're a naval architectural engineer, policy expert, or industry professional passionate about improving SFV safety and sustainability, we invite you to apply to participate in this important task force.

Application Process

To apply, please submit your application at <https://pegnl.ca/volunteer-application-form/> referencing the '**SFV Safety Task Force**'.

For additional information please email: pegnl@pegnl.ca.
