# CHAIR AND CEO REPORT

## Governance & Board Leadership

In 2025, the Board completed the final year of its three year governance cycle, advancing key priorities in regulatory oversight and policy development. This work strengthened governance practices, enhanced policy clarity, and ensured PEGNL's strategic direction remained firmly aligned with its mandate to serve the public interest.

A central achievement was the comprehensive review of PEGNL's Ends policies. Informed by years of education, owner engagement, and environmental scanning, the Board considered Ends revisions to clarify the responsibilities of licensed professionals, including reinforcing environmental responsibility within professional practice, as well as to emphasize the importance of informing governments on issues impacting the public interest as they relate to the professions. These updates position PEGNL to respond more effectively to emerging challenges and are now moving through the adoption process.

## Engagement & Foresight

The Board benefited significantly from the contributions of the Envisioning and Linkages Committees, whose collaboration ensured that owner feedback, sector insights, and long term trends meaningfully informed governance discussions.

Through initiatives such as the Board's Big Picture Thinking session, the Board examined emerging issues affecting the professions and their impact on the public, including evolving technologies, energy demands, the use and development of artificial intelligence, northern and remote development considerations, and meaningful engagement with Indigenous communities. This work enhanced the Board's understanding of the environment in which the professions operate and the implications for the public interest, providing a stronger foundation for forward thinking, strategic policy development.

## Board Learning & Development

The Board continued to invest in its own education, strengthening its capacity to govern in an increasingly complex environment. Building on prior learning in artificial intelligence, emerging technologies, and right touch regulation, the Board deepened its expertise through focused sessions on technology stewardship and governance development. This sustained commitment to education ensures that Board decisions, particularly those related to the evolution of the Ends, are informed by a forward looking understanding of risks, opportunities, and the expanding responsibilities of a modern regulator.

## Regulatory Modernization

In 2025, PEGNL advanced key initiatives to modernize its regulatory framework and processes,

delivering more efficient, transparent, and accessible registration. Preparation for changes under the Fair Registration Practices Act and associated regulations resulted in important updates to policies and workflows, while the launch of a new online application portal has already improved clarity, consistency, and processing efficiency for applicants. Together, these efforts strengthen PEGNL's ability to provide fair, transparent, and timely registration.

Cybersecurity remained a critical priority. As reliance on digital systems continues to grow, PEGNL enhanced its controls and monitoring to safeguard data and ensure regulatory systems remain secure and resilient. In addition, internal modernization initiatives improved service delivery, strengthened information management, and increased overall organizational efficiency.

## Outreach, Education & Professional Support

Outreach and engagement remained central to PEGNL's operations in 2025, expanding awareness of licensure requirements, professional accountability, and the value of regulated practice. Through targeted engagement with industry, academic partners, municipalities, students, and the public, PEGNL strengthened the understanding of regulatory requirements and reinforced the importance of professional standards in protecting the public interest.

This work was also supported through the continuation of a public relations campaign, delivering clear, consistent messaging on professional regulation and the standards upheld by engineers and geoscientists. By leveraging multiple methods, including social media, public signage, and radio, PEGNL broadened its reach and increased public visibility.

Professional development offerings were further expanded through PEGNL's shared online learning platform, developed in collaboration with regulators across the Atlantic provinces and the Northwest Territories. New modules on Indigenous learning, ethical conduct, equity diversity & inclusion, and professionalism supported ongoing awareness of ethical and regulatory matters. PEGNL also continued to promote technical and ethical learning opportunities through its weekly member announcements, helping support continuous professional growth.

### **Government Relations**

In 2025, PEGNL strengthened its engagement with provincial government departments and other regulatory partners ensuring that the perspectives of the engineering and geoscience professions were clearly represented in key policy and regulatory discussions. Topics of conversation included professional practice, regulatory modernization, public communication, and government policy development.

PEGNL played an active role in interprovincial and national discussions focused on harmonization, mobility, and shared approaches to professional regulation. PEGNL also contributed to collaborative working groups and cross sector discussions addressing matters relevant to public safety, municipal decision making, and regulatory effectiveness.

These relationships contribute to a regulatory environment in which governments are informed about issues affecting the public interest, and where PEGNL can provide relevant and timely input on processes and policies that impact the professions and the public they serve.

### **Emerging Areas of Practice & Sector Responsiveness**

As industries and areas of practice continue to evolve across the province, PEGNL remained focused on understanding and responding to the potential implications for professional regulation. This included consideration of professional practice in specialized areas, the viability of academic programs, and evolving competency expectations across both emerging and established sectors.

Through ongoing engagement with key parties of interest, PEGNL explored emerging trends, discussed the importance of regulated practice, and considered how the organization may need to adapt as technologies and industries change. Throughout this work, PEGNL's role remained clear and consistent: to ensure that the public can rely on competent, ethical, and accountable professional practice in all contexts.

### **Closing**

PEGNL's work in 2025 reflects a shared commitment across the Board, staff, volunteers, members, and partners to uphold the public interest during a period of change and evolution for the professions. Through strong governance, operational modernization, proactive engagement, and regulatory leadership, PEGNL remains well positioned to respond to the evolving needs of the public and the professions.

# INDEPENDENT AUDITOR'S REPORT

## Opinion

We have audited the financial statements of Professional Engineers and Geoscientists Newfoundland and Labrador (the Association), which comprise the statement of financial position as at December 31, 2025, and the statements of revenues and expenditures, changes in net assets and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Association as at December 31, 2025, and the results of its operations and cash flows for the year then ended in accordance with Canadian accounting standards for not-for-profit organizations (ASNPO).

## Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Association in accordance with ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is

sufficient and appropriate to provide a basis for our opinion.

## Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with ASNPO, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Association's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Association or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Association's financial reporting process.

## Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue

an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

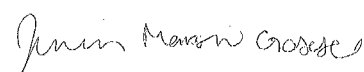

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Association's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting

estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Association's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Association to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

# PROFESSIONAL STANDARDS REPORT

**Bill Hunt**  
P. Eng., GSP, FEC  
Director,  
Professional Standards

## Allegations and Disciplinary Activities

At the start of 2025, there were seven active discipline files before the Complaints Authorization Committee (CAC). During the year, one new allegation was made by the Registrar and referred to the CAC. Five cases were decided by the CAC during the year, leaving three cases under active investigation by the CAC at the end of 2025.

## Compliance Activities

Compliance and enforcement activities are mainly proactive and are focused on ensuring individuals and firms are aware of the requirement to obtain appropriate licensure. Companies and individuals that appear to be practicing the professions, and/or using protected titles, but who are not licensed by PEGNL are contacted and informed of the legislative requirements. PEGNL's Compliance Committee remained very active in 2025, assisting in the improvement of our compliance efforts. We would like to thank the committee for their excellent work in 2025. Most compliance issues are resolved on initial contact but in some cases, follow-up is required, and, in those cases, a compliance file is opened. In 2025, 121 compliance files were opened and 53 were successfully resolved by year end.

## National Discipline and Enforcement Activities

The Discipline and Enforcement (D&E) staff at Engineers Canada and the D&E representatives from the provincial and territorial regulators met virtually in March, September and November of 2025 and face-to-face in June of that year. These meetings and the relationships built, enable a

high level of co-operation among Canadian D&E officials, which is largely fostered by Engineers Canada. This collaboration is invaluable for the sharing of best practices across the country.

## Practice Standards and Guidelines

PEGNL developed a new guideline on the use of artificial intelligence throughout 2025, with the intent of soliciting feedback from members in 2026.

## Ethics and Professional Practice

PEGNL continues to offer on-line Ethics and Regulatory learning modules through the learning platform and each of the modules can be utilized to fulfill the minimum mandatory requirements in the Ethical Practice and Regulatory Learning categories of the professional development program. In 2025, Geoscientists Nova Scotia and Northwest Territories and Nunavut Association of Professional Engineers and Geoscientists joined PEGNL, Engineers Nova Scotia, Engineers PEI and Engineers and Geoscientists New Brunswick on the learning platform, further expanding the sharing of learning modules among the six regulators.

We continue to deliver Professionalism and Ethics in the Workplace lectures in the winter and fall semesters to engineering students about to embark on their first work term and an in-person ethics seminar to the graduating Engineering and Earth Sciences students. We also deliver a presentation and Q&A session on Professionalism, Ethics, and the Requirements for Licensure to the graduating engineering class.

# REGISTRATION REPORT

**Heather Appleby**  
P. Eng., FEC  
Director, Registration

The Registration Committee determines the eligibility of new applicants for the right to practice engineering and geoscience in the province. It assesses applications for registration under the following categories: Professional Engineer, Professional Geoscientist, Engineer-In-Training, Geoscientist-In-Training, Limited Licensee, and Permit to Practice.

PEGNL experienced a net increase in individual registrations of 1.5%. Most registration categories grew or remained consistent from the previous year, with the exception of non-practicing members, dual registrants, and geoscientists-in-training. Permits to practice also experienced a net increase growing by 3.6%.

The Registration Committee evaluated a total of 686 applications in 2025, with 331 of those for professional licensure, 267 for Member-in-Training registration, and 88 for new permits or revisions to existing permits. The Registration Committee endorsed 360 mobility applications for professional licensure as required under the Canadian Free Trade Agreement. Mobility applicants are those that reside and hold a professional license in good standing in another province or territory.

The Registration team continued to focus on improvements in registration processes and processing timelines in 2025. PEGNL launched a new Applicant Portal system in May of 2025, which streamlined the application process and enabled applicants to monitor their application status. The Board of Directors also approved changes to the Registration Committee By-Law, which allows delegation of certain types of applications to the Registrar where registration policies can be clearly applied, improving processing timelines for those applicants. PEGNL also continued its outreach efforts in 2025, meeting with prospective applicants and several interest groups to share information about the requirements and processes of registration.

Volunteers are vital to the successful function of organizations such as PEGNL. Thank you to all PEGNL members who have helped with the academic and competency evaluation processes as well as members of the Registration Committee, the Examination Waiver Committee, the Limited License Assessment Committee, and the Academic Evaluation Committee for their time, dedication, and expertise.

# SERVING ON THE PEGNL BOARD OF DIRECTORS

PEGNL is governed by a twelve (12) member Board of Directors whose mandate is to administer the Engineers and Geoscientists Act and Regulations on behalf of the province of Newfoundland and Labrador. The Board is responsible for ensuring licensed, competent, and ethical practice of engineering and geoscience, and public confidence in these professions. The Board consists of nine (9) PEGNL members who are elected by the membership and three (3) public representatives who are appointed by the Minister of Government Services.

The Board governs the organization through the establishment of comprehensive policies that establish organizational outcomes, address organizational risks, and support effective governance processes. The Board's Ends policies define what must be achieved in order to advance the public interest.

## PEGNL's Ends Policies:

*The purpose of PEGNL is to advance the public interest with regard to the practices of engineering and geoscience (collectively the “professions”) in a manner worth the resources expended.*

- 1.1. *The highest priority among Ends policies is registered, competent, and ethical practitioners of engineering and geoscience.*
  - 1.1.1. *Practice and use of protected titles only by registered individuals and organizations.*
  - 1.1.2. *Practicing professional members demonstrate continuing professional development.*
  - 1.1.3. *Registered individuals and organizations are aware of the importance of equity, diversity, inclusion, and respect for differences.*
  - 1.1.4. *Registered individuals and organizations are aware of the importance of environmentally responsible practice.*
- 1.2. *The public is aware that the professions are regulated.*
  - 1.2.1. *The public is aware that there is a recourse mechanism related to allegations of conduct deserving of sanction.*
- 1.3. *Governments have information regarding the issues impacting the public interest as they relate to the professions.*

Each year, the Board conducts activities to help determine the appropriateness of the Ends. The Board takes part in linkages and envisioning activities, where it engages with owners and other stakeholders to determine trends that may affect its Ends policies and to determine if the Ends are in step with the future direction of public expectation of the professions.

Serving on the Board offers a meaningful way to support the safety and well-being of the people of Newfoundland and Labrador, while also providing the opportunity to give back to the professions. By building and shaping policy, you will help safeguard a better future for the people, environment and economy of Newfoundland and Labrador, while helping ensure a high level of professional excellence and public trust within the professions.

The following reflections from former Board members speak to the impact, responsibility, and rewards of serving on the Board.

***“It is incredibly gratifying to be able to know that you were part of a process that made your province safer and the workers within that province safer.”***

- Darlene Spracklin-Reid, P. Eng., FEC  
Former Chair, PEGNL Board  
President-Elect, Engineers Canada Board

***“Serving on the Board fundamentally expanded my view on what it means to be a professional; you stop thinking at the project level, you start thinking at a societal level.”***

- Steve Emberley, P. Geo.  
Former Director, PEGNL Board  
Director, Geoscientists Canada Board

***“Something I am proud of from my time on the Board, is that we reviewed the Ends of PEGNL and focused them on what is impactful for our stakeholders, part of those changes was to add statements about diversity, equity and inclusion, which I think is great for the professions moving forward.”***

- Nicole Myers, P. Eng.  
Former Director, PEGNL Board
